

THE Gleichen Call

TWENTY-FIFTH YEAR

No. 3

GLEICHEN, ALBERTA, WEDNESDAY, APRIL 8, 1931

SUBSCRIPTION \$2.00 PER YEAR

JOHN GLAMBECK GIVES ADVICE ON TREE PLANTING

I understand that the citizens of Gleichen are to have water for irrigation this year and naturally they will want to set out some trees, shrubs and flowers. I almost feel jealous of the Gleichenites. Here I have been struggling along for the past 20 years trying to grow trees on the dry prairie. Had I had access to irrigation, during those years, I would no doubt have been able to present a Burchard Garden by this time. Still as it is I have not done too bad. During my long years of experimenting I have learned a few things which I will pass on to all new tree planters. I find that the most dependable shelter trees for Alberta is Caragana, Green Ash, and Evergreens, particularly the native Spruce. I have also found that the Wild Siberian Crab and native wild plums are extremely hardy and will make splendid shelter trees. In these you have the apple and plum blossoms in the spring and the fruit in the fall, although the apples are very small but will make jelly. The wild plums are splendid.

The maples, poplars and willows are not much good on dry land but will no doubt do much better under water. However these trees make a fine shelter in two or three years and if planted alternately and not too thick they can be taken out of the grove later on in case they freeze back.

There are a number of very hardy shrubs that will do well in Southern Alberta. The old purple, the white and Joskia Lilacs, all do well. The tartarian honey suckle and spiraea are also hardy. The May Day tree (the old man) Virginia Creeper hops Mountain Ash and several kinds of hardy roses. In the perennial flower line I have found quite a few that are well adapted and hardy for our climate, such as tulips, iris, sweet Williams, gladiolus, peonies, dahlias, sweet rockets, holly hocks, columbines, lavatera and many others.

Small fruits such as strawberries, raspberries, red, white and black currants and gooseberries, all do well on dry land, with plenty of water it should be a cinch to grow them.

In the line of bigger fruit I find red and yellow Siberian crab, Transcendent crabs and the Hanson hybrid all very hardy and faithful. While the Cheney, Sapa, O'Neil and Tom Thumb plums do fine here.

In setting out windbreak trees plant 4 to 6 feet apart in row and about the same between rows. If you want a Caragana hedge plant about a foot apart. Evergreens must not have their roots exposed to the wind or sun and they should be protected with a shingle the first year. Set out fruit trees about 16 feet apart and 20 feet between rows. When you plant spread out roots and fill hole half full of top dirt tramp solid and put in a half a pail of water.

Keep roots of trees in a pail of water while you plant. Do not put manure around roots of trees when you plant them. Cultivate trees several times between May 1st and August 1st. Do not cultivate later than August 1st. Cut away all broken roots and trim top back a little when you plant, that is for bigger trees.

Tulips can only be planted in Sept or October they will bloom the next spring and ever after. Iris can be planted both fall and spring.

In planting a variety of perennial flowers you have the advantage of having these show up regular as clock work every spring and every day every week, you have something new to look for. In setting out both shrubs and flowers you should try to put the tallest in the back ground and the shorter or smaller ones in the front. A lawn with a few round or oblong beds of shrubs and flowers looks very nice.

Miss Jennie McBean who is attending high school in Strathmore is spending her Easter holidays at the farm home of her parents Mr. and Mrs. Duncan McBean.

IRRIGATION CARRIED HUNDRED PER CENT Two Separate Votes Cast No Ballots Spoiled

The vote on the irrigation project will go down in the annals of the town as the first time in history of Gleichen in which the townspeople have shown a solidly united front on any civic enterprise. The 100 per cent result of the ballot together with the heavy poll cannot fail to be a source of gratification to the Mayor and Council and to the others concerned in the preparation of the scheme and its presentation to the ratepayers for their approval.

Some 20 years ago the files of the "Call" contain notice of an offer by the C.P.R. to supply the town with water for irrigation purposes but this is the first time that the matter has been placed before the voters for their decision, and right royally have they expressed their approval. Now it only remains to carry through the project in the same whole-hearted and enthusiastic manner in which they registered their approval.

Leaving the accounts of the system to be installed, to other and more competent people, the editor desires to call attention to some of the benefits that we may legitimately look for from the system we are installing. Suffice it to mention that this will be the only pipe system in the west and consists of a reservoir to be placed N. W. of the Sports ground a pump to supply flow and pressure and pipes of varying diameter to convey the water to the different properties. In rejecting the open ditch system the Council are to be congratulated, but the co-operation of water-users will be necessary if the full benefit is to be gained.

These benefits are of two kinds: those we will experience as an immediate effect, and those which we will experience to a greater degree as time passes. There will be a demand for labour which will be welcome to many of the townspeople as a certain portion of the cost will involve labour charges and this will pass to men of the town who will naturally have preference in whatever work is to be done. Then there is the psychological effect of the feeling that now gardens are likely to be a source of pleasure and profit instead of merely a chore. This is seen already in the interest being taken in the "plan us" process in operation all over the town, and the increased personal pride in the appearance of his home, with the consequent rise in value commensurate with the care bestowed and the situation and extent of his holdings. A proper personal pride in one's home will flourish and grow, and reflect in the conduct and affairs of the town. The housewife will lay down her dustpan with a sigh of relief and if she does have to take up the fly-swatter and wage relentless warfare with the winged enemy, still she will, the battle being won, be able to take a long cool drink under the shady trees or the front lawn to the confusion of all buzzing, biting, flying enemies of human comfort and relaxation.

As to the individual, so to the community. A civic pride will replace the don't care attitude and we expect that the residents will be enthusiastic for all suggestions for the benefit and beautifying of the town. The younger generation will imbibe this spirit and consequently we shall have a clean town materially and morally speaking. To travellers by train and car we shall be noteworthy for the cohesiveness and thriftiness apparent from the train as it passes through. The effect of well-cared for trees and well-painted, well-kept homes will be particularly noticed by the traveller.

A cosy, well-shaded camping ground will attract tourists who at present dash through to stay at other towns along the road. Last, but not least there is the cycle of benefits upon the health of the population. Summer sports will

be available at our own doorstep. The reservoir will in time become a real beauty spot and consequent centre of communal activities. In the summertime, with swimming, boating and aquatic generally. We fully expect that the boys who dash around in the latest form of "bug" will insist on imitating the water-spider and dash over the limpid waves with the same nonchalance they display on the "ard, high road. Then think of the appeal to the most important of our number, the girls who will be able to prevail upon some defenceless male to take them "boating in the moonlight". Oh, why are we getting old when such delights beckon to the rising generation?

Thus we are within measurable reach of the haven of attainment of all small communities—good school, good, well-cared for homes, a prosperous, contented population, and every house in town occupied by an alert, progressive and intelligent citizenry. All these benefits, the editor considers, we may expect to enjoy out a same support of the scheme is just as necessary to bring it to full fruition as was desirable at its inception.

22ND BATTERY, C.A., CHURCH PARADE NEXT SUNDAY

The 22nd Field Battery, C.A., will attend Divine Service on Sunday, 12th April, in memory of those officers, warrant officers, non-commissioned officers and men of the 22nd Field Battery C.A. who formed part of the Canadian Corps during the Great War and remained in France and Belgium as part of our glorious dead.

The 22nd Field Battery C.A. perpetuates the 22nd Battery C.F.A. This battery was organized in Brockville, Ontario, in the early part of 1915 and arrived in England as part of the 6th Brigade C.F.A. under the command of Lieut. Col. E. W. Rathbun, of Deseronto, Ontario. This brigade was disbanded on arrival in England and became (with details of the original 1st Divisional Artillery, left behind when this division left for France) the reserve brigade C.F.A. Shorncliffe, England. The 22nd Battery C.F.A. was commanded at this time by Major W. R. Reidon, of Belleville, Ontario. On September 19th, 1915 Major B. M. King, D.S.O. was authorized to form the 6th Howitzer Brigade, C.F.A. the personnel being drawn for the reserve artillery, Major King D.S.O. was promoted to the rank of Lieut. Colonel and the 6th Divisional Artillery, on January 10th 1916. The batteries of this brigade were as follows: 21st Howitzer Battery, under the command of Major A.G.L. McNaughton, the present chief of the general staff, Ottawa. The 22nd Howitzer Battery C.F.A., under the command of Major J. Keller McKay. This officer was twice wounded, received the Distinguished Service Order, and was twice mentioned in dispatches to the secretary of state for war, England, was promoted to the rank of 23rd Howitzer Battery under the command of the 8th Howitzer Brigade; and the 23rd Howitzer Battery under the command of Major H. F. Geary. This brigade took part in every engagement that the Canadian Corps took part in, from January 1916, until the arrival in Bonn, Germany, in November, 1918.

On the re-organization of the Canadian Active Militia, after the war, Major A. G. B. Lewis, Gleichen, was authorized to organize a Field Battery in Gleichen, Alberta, to be known as the 22nd Field Battery C.A. 19th Field Brigade C.A. and to perpetuate the 22nd Howitzer Battery C.F.A. The officers of the 22nd Field Battery are as follows. Officer Commanding, Major A. G. B. Lewis, Battery Captain, Capt. E. B. Taylor, Gur Position Officer, Lieut. R. Dodgson M.M. Section Commanders, Lieut. J. W. Jeffers, 2nd Lieut. K. B. Lockett. Divine service will be held in St. Andrew's Anglican Church, for Protestant members of the Battery and at St. Victor's Church for the Roman Catholic members. The Battery will fall in at the Armoury for this parade at 10:30 a.m. and service will

MAYOR A. R. YATES THANKS PEOPLE FOR UNANIMOUS VOTE

May I take the opportunity, through the Gleichen Call, to express my thanks to the ratepayers and citizens of our town for the splendid manner in which they supported the irrigation by-law. The fact that the by-law passed unanimously indicates that the ratepayers are behind the project. I particularly want to thank the non-resident ratepayers who, while not owning gardens and homes, supported this very important undertaking. They too, I am sure will indirectly derive a benefit from having irrigation in the town, for as our town improves, business will naturally follow and property should increase in value.

Now that irrigation is assured we should have every reason to feel that as a town, we are entering on a new era of prosperity.

Every citizen can do his share in improving the appearance of Gleichen. May I therefore, appeal to every ratepayer and renter to try, if at all possible, to paint his home, buildings and fences, plant trees, gardens and clean up his premises. If you do not own a lot, secure one from the town and plant a garden. Let the renter of a home request his landlord to paint his buildings if needed.

The Board of Trade has kindly offered to undertake a campaign of tree planting along the streets.

Let us also set the example by painting our Community Hall and our Churches. With every one co-operating in this way we can make our town attractive both to ourselves and to visitors. The financial condition of our town is splendid, let us try to make its general appearance equally as attractive.

A. R. YATES, Mayor "IRRIGATION"

Gleichen lives! Who said she'd died? She has fellowship and pride! Now her motto: "Irrigation, Floriculture, Cultivation."

Watch her trees and green lawns grow;

See her beautiful gardens blow. Gleichen will be her people's boast; "Irrigation" be their toast.

Trees, where birds may perch and sing; Flowers to scent the air of spring; Things of beauty from the soil Shall reward her humble toil.

Trees, in time, shall line the street; Flowers caress her people's feet. Watch her grow in enterprise. Irrigation's Paradise!

Alan Murray,
Gleichen, April 3, 1931

Services at the Community Hall, Easter Sunday evening, was well attended. George McElroy occupied the pulpit, and his mother gave some special music with a Swiss lute while she sang Mrs. McElroy also gave several selections on the cornet which was greatly appreciated. Mrs. McDonald, of Innisfail, and Miss Swanson of Calgary sang several times which was also much appreciated. She gave us some special songs. Mrs. McElroy's cornet is a very rare instrument there being only 8 like it in the world. When she was a young girl she used to sit on Wm. Booth's knees, (founder of the Salvation Army), and play this cornet. She promised to play here again in the near future.

Good Friday was a very quiet day in town. All places of business being closed.

Commence at 11 o'clock. The Rev. J. R. Davies, who is also a returned soldier, will preach a special sermon for this service.

The officer commanding extends a special invitation to all ex-soldiers of the district to take part in this parade. The general public are also invited to attend the service.

CRAIGANTLER AND DISTRICT NEWS

A number of the boys of the district left with O. Birkgreen to work on the Saskatoon Highway.

SI Sheets has taken over the books of the Kant Kick Club. Bill Pettit has disappeared to regions unknown. Mr. and Mrs. J. Sharp of Ellwood were visitors with Capt and Mrs. Grant on Sunday last.

Paul Green and Harold Sheets visited George Grant on Sunday to say good luck before he left for the East. Mr. and Mrs. Albertsen are visiting over Easter with S. Damgaard of the braes.

Howard Ellis is home for the Easter holidays.

C. Christensen, fox rancher and trader in all kinds of fur animals has hired on with H. B. Grant of the Deer Lodge farm for the season.

NAMAKA NEWS

Mr. Claude Mackie was a Calgary visitor on Monday.

Miss Grace Scheer is spending the holidays at her home.

Miss Marjorie Wooster is spending the week with her parents in Namaka.

Mr. and Mrs. Carman Watts and family spent Sunday visiting Mr. and Mrs. Chester Edwards at Majorville. Miss Eileen Mackay, a normal practice teacher of Calgary spent last week teaching in the junior room of Namaka school.

Miss Kathleen McLaughlin of Sacred Heart Convent Calgary, is spending the Easter week with Evelyn Ley.

Mr. Wilbur Woodward has been on the sick list for the past week. We are glad to report that he is now on the road to recovery.

Quite a number attended the Easter Services at the Namaka United Church on Sunday, where a very impressive service was delivered by Rev. E. B. Brundage.

Mr. Kenneth Watts has purchased a new Ford car. Watch his smoke Mr. Jacob Martens motored to Crowfoot on Monday. He expects to move his family there in the very near future.

A party was given in the Oddfellows' Hall on Thursday evening in honor of Mr. and Mrs. Robt. Anderson this being the occasion of their twenty fifth wedding anniversary. Dancing was enjoyed and they were presented with a silver casserole and a host of good wishes from their many friends. Mr. and Mrs. W. H. McLaughlin formerly of Cluny spent the week-end with Mr. and Mrs. A. Ley, enroute to their new home in Weyburn, Sask.

Don't forget the picture show or Saturday evening, April 11th, in the hall, under the auspices of Namaka Ladies' Aid. Ice Cream will be served.

EASTER SERVICES ANGLICANS HOLD

Members of the Anglican Church in Gleichen and district celebrated this feast in the usual manner. The beauty of the Holy Communion services was intensified by the well-loved and well known Easter music and by the gladness of the Easter message. The services at St. Andrew's Church and the one at Cluny were exceptionally well attended. The Rev. J. R. Davies spoke to the children at 11:00 a.m. on the lessons nature teaches regarding the resurrection. And to the adults at 7:30 p.m. on the "Assurance and Challenge of the Easter message." The beautiful altar flowers consisting of Easter lilies, carnations, daffodils and narcissi were the gift of Mrs. Gale of Calgary and Mrs. J. C. Hutcheson in memory of the late Mrs. Jowett, and added much to the beauty of the church.

Miss Melrose, who is teaching at Champion, spent a few days in town visiting friends over the week-end.

Mr. and Mrs. J. Guttman and family were the guests of Mr. and Mrs. Mac Silver of Calgary, for the Feast of the Passover.

RED & WHITE STORE

We congratulate our fellow citizens for the unanimous vote for the irrigation system.

W. Schmidt has installed a late model lathe in his place of business. It is really a wonderful piece of machinery and already he has done considerable repair work with it. This is something Gleichen has needed for a long time. When you want a new part made or a piece of steel cut, it is not necessary to waste time going to Calgary for Mr. Schmidt can do just as good a job, as can be done anywhere. We know where of we speak for we have seen the lathe in action. You are welcome anytime to inspect his work and the lathe.

WANTED—Position as housekeeper Apply Box 81, Cluny.

ENO'S
FRUIT SALT

**The Safest,
Surest Way
To Health**

The daily dash of ENO in a glass of water every morning is the safest, surest way to inner cleanliness. And to be inwardly clean is to be healthy.

ENO'S "Fruit Salt" is a delicious health beverage that tones and sweetens the entire system. For constipation, acid stomach, fatigue and biliousness it is without equal.

But remember, only ENO can give ENO results.

A 1931 Seed Time Problem

Seeding time throughout Western Canada is at hand, and, as the farmer overhauls his ploughs, harrows, and seeders in preparation for the Spring work, he naturally is looking forward and planning just what he ought to do in the light, not only of his own individual circumstances, but of prevailing world conditions and prospects.

The prairie farmer is an optimist, as a rule. Indeed, to succeed, he can hardly be anything else. Unquestionably, however, there is less optimism prevalent as the season of 1931 opens than is usually the case throughout this western country, and many farmers are in somewhat of a quandary in reaching a decision just what is best for them to do this year.

Most of them have been growers of wheat. It has been their major article of production. Upon it they have depended for success. But for the past year and a half wheat has been a drug on the world's markets. The selling price has fallen well below the cost of production. There is a large surplus stock on hand in various countries. What, then, is the prospect for disposing of a new crop of wheat at profitable prices in 1931? Yet the vast majority of prairie farmers cannot turn from wheat growing to something else in one short season, even if it was advisable to do so.

Under these circumstances should the farmer proceed to seed the average number of acres he has been seeding in years past? If he does and all the great wheat growing countries, as well as Canada, harvest an average normal crop, will the price obtainable for the wheat yield him a profit, or will it again fail to cover the costs of production and leave him in a worse position than if he had grown no wheat?

Inasmuch as the farmer cannot rest from growing something,—his livelihood depends on his production,—and as the prevailing prices for coarse grains also are less than production costs, the farmer is confronted with a real problem, and one he must decide for himself. Another crop failure, or partial failure, would be a disaster. Equally, a large crop throughout the world would mean loss to the producer. It is a gamble either way. If the Western Canada wheat grower could be assured of a good crop, while below average crops were the rule in other great wheat producing countries, his course would be clear. But as to this no man can foretell.

Possibly many farmers will consider it wise to merely seed sufficient acreage to provide him with a livelihood if all goes well, and devote his time to the eradication of weeds and the more thorough cultivation of his land in preparation for future operations, coupled with the planting and expert care of a garden sufficient to supply the needs of his own family during the summer and next winter.

A goodly number of farmers will have to look to the Government to supply them with seed; many others will not be able this year to buy registered seed, but whatever acreage is sown, be it large or small, should be seeded with good, clean seed, the best it is possible to obtain under the circumstances.

Generally speaking, too, farmers will have to keep down all overhead expenses. Last year's plough, harrow and seed drill will have to do service another year. Therefore, careful overhauling of all present equipment will undoubtedly be one of the outstanding activities on farms at this time. The farmer and his family may have to work even harder than usual and possibly get along with one hired man where formerly two were employed, even though this may operate to continue or temporarily intensify the existing unemployment.

In a word, everybody must face and adapt themselves to the hard, unpleasant facts of the existing situation. Present problems cannot be solved and difficulties removed solely by Governmental action, the extension of credits, or any other external agency or action. These may help, but at best, they are only temporary palliatives. Each individual must, in the final analysis, face his own problem, decide upon his own line of operations this Spring, work out the basic needs essential to his own salvation.

This article is not a preaching at farmers; it is not an attempt to advise farmers, for if there is one individual for whom the writer has a contempt it is the arm-chair critic, the arm-chair farmer. The existing situation, as the writer sees it, is that each and every man must exercise his own best judgement in the light of his own particular circumstances, and proceed with all the ability and energy of which he is capable to work out the solution of his own problems, and thereby make his contribution towards finding a solution for the problems of all others and the country as a whole.

White Hunters Protest

The Indians' right to trap beaver is contested by the white hunters of Fort Smith, in the northern part of Alberta. At a protest meeting, held recently, a number of the white trappers declared it was unfair to deny the white man the privilege of trapping the beaver, while Indians and half-breeds were allowed 15 beaver each season.

A metal tube which cuts a core of snow is the device used in estimating how much water the snow of a region is apt to yield.

A newly patented umbrella has a flashlight in the handle for night use.

Growth Of Canadian Newspapers

The first issue of the Halifax Gazette, Canada's first newspaper, was printed on a half sheet of foolscap. Some of the Saturday and weekly editions of present-day Canadian newspapers require 60 to 100 pages, 8 columns wide and 28 inches deep, in which to give the desired information to the people.

Gossip is the mother-in-law of falsehood.

England imported \$300,000,000 worth of pork and bacon last year.

Salt is the only food product which must be imported into Hungary.

Suffered From Heart Trouble

Became Weak and Run Down
Mrs. Wm. Diotte, Glenside, Ont., writes:—"For a long period I suffered from heart trouble, and became very weak and run down. I tried various remedies, but they did me no good. One day I met a friend and told her of my trouble. She said she had had heart trouble for two years too, but after using Milburn's Heart and Nerve Pills for a short time she had been relieved of her trouble, so I got two boxes and after taking them I was again feeling fine, and always recommend H. & N. Pills to anyone complaining of heart trouble."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The W. N. U. Co., Ltd., Toronto, Ont.

The Value Of Carbon

No Form Of Life Can Exist Without This Atom

The most wonderful substance in the world is carbon. Soot, lamp black, and pencil leads are all forms of carbon—and so is the diamond. The carbon atom possesses one remarkable quality. It enables other atoms to combine into huge groups of families from which all kinds of substances are made. By themselves, the atoms oxygen, hydrogen, and nitrogen can produce nothing very startling, but add carbon and their combinations become amazing, giving rise to such substances as petrol, oil, medicines, bread, and meat. If it were not for carbon, life could never have existed upon this or any other world. All kinds of living things—fish, flesh, fruit, and fowl—owe their existence to the carbon atom. No one knows why this should be so, for the carbon atom differs from others only in having one electron more or less than they. But it is quite certain that it is the foundation-stone of all life.

Just Right For Upset Stomach

For after-eating distress, gas, sourness and bloating, the quick and positive neutralizing action of Bismarck Magnesia has proved to be just right! Relief, certain and gratifying, almost instantly follows the very first dose—and a few cents worth obtainable from any good druggist, lasts for a long time.

Canada's Trade Balances

Six European Countries Bought More Than They Sold In 1930

With only six European countries did Canada enjoy a favorable trade balance, in 1930, according to a return issued by the Dominion Bureau of Statistics. These were Denmark, Norway, Greece, Netherlands, Italy and Belgium.

Japan and China were the Asiatic nations which purchased more from this country than they sold to Canada.

Argentina, Brazil and Cuba were countries of South America, and the Caribbean, which all gave Canada a favorable balance of trade.

The greatest spread was in trade with Greece. The Hellenic Republic bought goods from this Dominion valued at \$6,651,000, and sold to Canada commodities with a value of \$234,000.

Nothing As Good For Asthma. Asthma remedies come and go but every year the sales of the original Dr. J. D. Kellogg's Asthma Remedy grow greater and greater. No further evidence could be asked of its remarkable merit. It relieves. It is always of the same unvarying quality which the sufferer from asthma learns to know. Do not suffer another attack, but get this splendid remedy today.

Results Were Startling

Investigation By 'Phone Company Shows Decline In Conversational English

An investigation conducted in New York by the American Telephone and Telegraph Company's engineers, who listened-in to telephone circuits over which business calls predominated, gave startling results regarding the decline in conversational English. Of 79,390 words recorded, 20 simple words—principally the personal pronouns, prepositions, conjunctions and a few verbs—made up nearly half. More astonishing still is the fact that 155 words, including the 30 already mentioned, made up more than 20 per cent. Grammarians will be horrified to learn that "shall" was heard only six times; while "yeah," "uh-huh" and "er" were plentiful; and the grunts and monosyllabic replies recorded ran into the thousands.

Quick action saves trouble, worry. Keep Douglas' Egyptian Liniment always handy. Stops bleeding instantly. Cauterizes wounds. Hair comes back. No scar remains.

Making Business Hum

A London, England, department store gave out \$2,500,000 worth of orders to wholesale houses in one day. It then published big ads in the newspapers inviting the public to come and buy the lot up in one week. That's the way to make trade hum.

Canada's Highways

The total highway mileage of all classes of road open for traffic in the Dominion of Canada at the end of 1929 (latest official figures), amounted to 390,060, which was an increase of 8,083 miles during the year.

A fountain pen for writing in dark places is equipped with a small flashlight.

World Waiting For Disarmament

General Agreement Expected To Be Reached At Conference Next Year

The world can disarm its forces of land and air by following the methods embodied in the Italo-French naval accord—actual reduction of armaments as well as limitation of them. Dino Grandi, minister of foreign affairs, told the Italian Chamber of Deputies, in reporting to it the details of the naval agreement.

That such disarmament of aerial and military units may be agreed upon at the general disarmament conference next year has been made more probable, the foreign minister said, through the influence of the present agreement.

Grandi called the arms conference which will meet in February, 1932, under League of Nations auspices, the most important since the war, and said tremendous preparations for it were under way. Political relations are being improved in anticipation of the coming parley, he said, governments are exchanging viewpoints and public opinion is being given voice in the nations which will have a part.

Grandi spoke before a distinguished gathering which included Premier Mussolini.

He said the Italian principles in the problem of disarmament were two: Reduction of armaments to the lowest possible limit, but parity with the most heavily armed power of continental Europe.

No naval agreement which results in a five-power treaty is a victory for anyone, he said, but it is "a victory of commonsense."

Storm Makes Water Salt

Nova Scotia Lake Is Now Part Of Atlantic Ocean

Once upon a time, in fact as late as a few weeks ago, there was a deep lake of fresh water on Sober Island, off the shores of Halifax county, Nova Scotia. The lake is still there, but a storm came and now the water is quite salt. Adding new territory to their Atlantic domain, hungry seas tore through a wide wall of earth and trees ten feet high, and the mile-long lake that provided generations of fishermen with ice and a natural rink now rises and falls with the tides. At high tide fairly large vessels can enter through the wave-beaten passageway and anchor in the lake.

One island resident, looking back 85 years, says that never before withing that period has salt water entered the lake.

Persian Balm—the one toilet requisite for the dainty woman. Delightful to use. Leaves no stickiness. Swiftly absorbed by the tissues. Delicately fragrant. Imparts a velvety loveliness to the complexion. Tones up the skin. Soothes and banishes all unpleasant roughness or chafing caused by wind and other weather conditions. Make hands soft and white. Creates an elusive, essentially feminine charm. Persian Balm is indispensable to women of refinement.

Would Say Plenty

Lemuel—What would your wife say if you bought a new car?

Samuel—Look out for that traffic light! Be careful now! Don't hit that truck! Why don't you watch where you're going! Will you never learn? And a lot more like that.

Bequest Was Not Wanted

U.S. Universities Refuse Fund For Campaign Against Women Workers

The hope of the late Albert E. Pillsbury, that Harvard, Yale, Princeton and Columbia would carry on his campaign to keep woman in the home and out of politics and business seems doomed to disappointment. All but Yale have now refused to accept the bequests in his will to establish lectureships on this burning question, and there is little doubt that Yale will follow their example. Even though the university authorities were left free to adopt what they judged the most effective method "toward creating or developing sound public opinion on this subject," the known views of the donor have apparently precluded any idea of using his money in a study of feminism.

If Mr. Pillsbury had died a quarter of a century earlier these universities might have accepted his bequests with alacrity. But woman is so far out of the home and in business and politics that college professors could lecture interminably without in any way affecting the situation. Many of them might be glad to do so, and if the decision had been left to them the lectureships might have been established, but presumably the college authorities had also to consider whether there would be any students to listen.

What will now be done with the money we do not know. On the principle of making the most of a bad job it might possibly be diverted to lectureships in the women's colleges on how to vote intelligently.

To Protect Coal Industry

Value For Duty Purposes Fixed On Bituminous Coal

In order to prevent dumping into Canada of bituminous coal, the value for duty purposes has been fixed by Hon. E. B. Ryckman, Minister of National Revenue, at \$1 per ton on slack coal, and \$1.25 on run of mine. The order-in-council provides that these values are to apply to the point of production, and when the coal is brought into Canada from a diversion or intermediate distributing point, all charges to such intermediate point are to be added to the value for duty purposes.

The effect of the order-in-council is that if coal is brought into Canada on a cost basis of less than \$1 for slack, or \$1.25 for run of mine at the point of production, the dumping clauses of the Customs act will apply and the differences will accrue to the government in the form of customs duty. The ordinary duty of 50 cents per ton on bituminous imports remains unchanged.

The new provisions are not to apply to importations bonafide purchased and in transit to Canada on or before March 14.

Setting of value for duty purposes follows a series of representations made to the government by bituminous producers in this country who claim they have suffered as a result of unfair competition. The action by the minister is expected to have an effect on production of both Nova Scotia and Alberta mines.

India Air Mail Heavy

Many Strange Things Included In Cargoes From England

Imperial Airways' regular fast weekly air service to India is now carrying on the average of 40,000 pieces of mail weekly. As many as 70,000 pieces have been sent on occasions.

The speedy service has also attracted many strange cargoes, the most remarkable being perhaps the special false beard made in London in a hurry for a theatrical performance in India.

Hospital vaccines, medicine, toys for children of Andia Rajah and special hatching eggs are just a few of the remarkable cargoes borne by the argosies of the air to the far-distant cities of India.

German Invents New Mirror

A non-breakable mirror of wood has been invented by a German scientist. The wood is soaked in a caustic alkali after which it is put through a process of immersion into metals and chemicals. The wood then is dried and rubbed with a smooth piece of lead, tin or zinc, until it is brilliantly polished.

Nobel, founder of the Nobel prizes, owed his great fortune to the discovery of dynamite.

A British scientist says that as many as 50,000 living species of molluscs are known.

Newfoundland Commemorates First Trans-Atlantic Air Mail Flight

Newfoundland has issued a postage stamp commemorating the first trans-Atlantic air mail flight, which was accomplished in 1919 by the late Sir John Alcock and Sir Arthur Whitten Brown. The stamp is the fifty cent denomination of the Newfoundland air mail series. The dollar stamp of the series bears a map showing the routes of all the great trans-Atlantic flights. The series was printed in England and is beautifully designed and engraved. The tenth anniversary of the flight was commemorated by Newfoundland with a special postmark.

Escaped From Russian Prison

English Engineer Under Care Of British Embassy At Warsaw

M. Thompson, an English engineer, has been taken care of by the British Embassy at Warsaw, Poland, following his escape from Russia. The man was found hanging under a car when the Moscow-Warsaw express reached Warsaw. He said that he had been working in a Russian factory and had been arrested by the O.G.P.U., the Russian secret police, and taken to a prison in Tomsk. He escaped and reached Warsaw by walking and by beating his way under trains.

Saskatchewan Poultry Pool

Increase Shown In Volume Of Business Over Previous Year

An increase of nine per cent, in the volume of product handled by the Saskatchewan Poultry Pool, Limited, for the year ended January 31, 1931, as compared with the previous year, was noted in the report of the president, Mrs. Bertha Holmes, submitted at the recent annual meeting of the Pool. A considerable increase in membership was evident, a total of 2,418 new contracts having been received during the twelve months.

Gleichen's New Day

The Ramsay Mercantile Limited take this opportunity of congratulating the Council Board of Gleichen in the successful issue of the Irrigation Project. They deserve the thanks of all citizens and their names should be inscribed in bronze, that future citizens may remember them, as those who did the most for Gleichen in the reign of King George.

The day of Gleichen's National flower the tumble weed is over and in its place we should have many magnificent Trees and Grasses galore. to say nothing of gardens.

Ramsay's Live Store will keep in the race for honors with our fair town and our Establishment will be kept right to the front; a store that any live town can be proud of.

We take off our hats to Gleichen and its new water system. The opportunity is now ours as Citizens to dress old Gleichen up. Bob Ingersoll used to say, "Grass is the forgiveness of nature." So may we join with each other to make 2 blades of grass grow where before there was none.

Hurrah for the new water system.

Yours Respectively,
Ramsay's Live Store

BARBER SHOP

REGULAR MEETING BLACKFOOT M.D.

At the last meeting of the council of the Municipality District of Blackfoot the following councillors were present: Messrs. Umbreit, Bellingier, Deschamps, Wheatley and Nelson. This was the first meeting that new councillor Bellingier and Nelson had attended in their capacity as councillors.

Councillor Thorsen was elected Reeve for the year. Councillor Umbreit-Liquette-Reeve for the first six months.

It was decided that members of the committees appointed by the Council to attend to matters affecting the municipality be paid their expenses at the rate of \$1.00 per day for attendance at the Ratepayer's and No. 1 meeting and a similar remuneration as paid for attendance at Council meeting and mileage.

The finance committee will consist of Councillors Thorsen, Wheatley and Bellingier. And the legislative committee will consist of Councillors Bellingier, Wheatley and Bellingier.

Councillors for Division 1, 2 and 3 will be a committee to settle disputes in connection with damage claims at the pound situated on the S.W. 3-24-40; and that Councillors for the Division 4, 5 and 6 be a committee to settle disputes in connection with damage claims at the pound situated on the S.W. 22-23-22-40.

Messrs Collins and Collins, Chartered Accountants be appointed auditors for the municipality at a salary of \$175.00 per annum. The method of employing medical officers with office at the Town of Gleichen. The council will constitute the Local Board of Health and each councillor to be a executive officer of the board to look after health matters in his Division.

The regular monthly meetings of the council will be held on the second Tuesday of each month at 10 a.m. all that meetings will be held in the Municipal Office, at Gleichen unless some time and place be changed by resolution of the council.

For Calgary Power Co. Ltd. and franchisee Street Light Contract can did at previous meeting. Correspondence from Company in this connection read. It was decided to re-consider the previous decision re cancelling contract with the Calgary Power Co. Ltd. for two three street light.

Councillor Mr. Umbreit was appointed official representative of the Municipality at the annual meeting of the representatives of the Municipal Districts in the Hall Insurance District.

Councillor Umbreit, I understand, at Hall Insurance Companies are making application to the Alberta Legislative Assembly for permission to sell a Re-insurance Hall Insurance policy. I move that this company be on record as being absolutely opposed to this bill becoming law.

Councillor Thorsen: That we instruct our representative to the Hall Insurance District Annual Meeting that we are opposed to the principle of a flat levy for Municipal Hall Insurance over the entire Province.

Carried. Councillor Nelson moved and carried that school districts be dissolved and as to the borrowing powers of this Municipality for school purposes being limited and suggest to school trustees that school expenses be adjusted to coincide with the ability of the municipality to finance them.

Read Commissioner J. H. Wright's resignation to take effect March 31st 1931 was read.

Councillor Bellingier: That Mr. J. H. Wright's resignation be accepted and that he be given a vote of thanks for the valued services he has given this municipality during the past nine years and that the vote of thanks be in the form of a letter signed by the entire council.

The road commissioner advised that District Engineer Frame had suggested that guard rails be erected on the Standard district highway.

A petition signed by thirty-one ratepayers of Division No. 2 of the municipality asking that a moderate amount of relief roadwork be undertaken as early as possible this coming season and a letter from the South Valley Ratepayers Association with a similar request were read.

Councillor Wheatley: That this council go on record as being sympathetic to granting a small amount of relief roadwork in preference to advancing indigent relief.—Lost.

Councillor Umbreit: In view of the present low price of grain it will be difficult for farmers or municipalities to operate their tractor equipment unless the price of gasoline and oil are materially reduced.

Therefore he it resolved that the Council of the M. D. of Blackfoot No. 218, co-operate with other municipalities and communicate with the Provincial Premier and request him to arrange a meeting between the oil

Milo News

Mrs. Ed. McNeil, who has not been very well this winter, was taken to a Calgary Hospital last week.

Even the poor poorly paid section men on the C.P.R. are having their income reduced and only allowed to work half time this winter.

In spite of the poor outlook for farming, at the present time, there are some farmers in the district who refuse to get cold feet.

John Long, Milton Frances, and S. Carlson three Majorville old timers, have been on the sick list this winter and spent most of the time in the Hassano Hospital. According to last report they are all improving.

John Winkler, east of Queenstown has added two new sections to his previous large holdings and Roy Allen of Queenstown takes another 2 sections while Louis Ivers, Milo takes one. This land was formerly farmed by the Blackfoot Farming Company, and is situated on the south end of the Indian Reserve. In the near time the former manager of this big farm, who absconded last fall, has been picked up and is now journeying in Lehighville jail.

Last fall the Brooks Nursery Co. shipped into Milo around a hundred dollars worth of Nursery stock, orders taken by their agent last summer. Owing to the fall of the price when the farmers, who had ordered this stuff, were unable to take it out and pay for it at the station and after lying around for a long time the station agent was allowed to take and haul it in and do as he pleased with it this spring. Now as there is a nice piece of ground owned by H. R. Co. between the station and station house, I would suggest to the Milo Board of Trade to have this ground plowed up and trees planted in it. It would add a little beauty to the town.

IMPORTANCE OF USING RASPBERRY CERTIFIED STOCK

In order to avoid disappointing results in new raspberry plantings growers are strongly urged to use Government certified raspberry stock for setting out. This recommendation is made because it is realized that certain serious diseases of the raspberry are commonly spread through planting canes from diseased parent plants. These diseases are mosaic and leaf curl are known to cause reduced yields, inferior quality fruit and in addition, are contributing factors to killing back and death of plants.

From a study of these diseases over a number of years it has been repeatedly demonstrated that the prevalence can be greatly reduced by the use of certified stock which is known to be free from disease. Such stock has received rigid inspections during the growing season and found to be free from mosaic or leaf curl has been used for planting out will in due time vigorous, healthy plants which will remain profitable for a long time. On no other basis, where stock planting is carried from an unknown source the possibility is that the new plants will contain high percentages of disease. Such a plantation has at best a poor start; the new plants will be stunted and weak, eventually dying or producing reduced yields. In addition they provide a source of further infection to remaining healthy plants and as the disease spread is quite rapid in a plantation a short time will see its production.

Congratulations

To the People of Gleichen on the passing of water By-laws. Prepare your gardens and be ready for Irrigation.

A. R. YATES
Rexall Drug Store, Phone 30

Most unprofitable. Avoid such results by using certified stock, thus insuring a healthy start to a plantation which will continue profitable a greater number of years.

The inspection and certification of raspberries is carried on annually by the various branches of the Division of Botany. This service to the growers is free of charge and full information concerning its features will be furnished on request to the Dominion Laboratory of Plant Pathology, St. Catharines, Ontario, or to the Division of Botany, Central Experimental Farm, Ottawa.

TOWN AND DISTRICT

Mrs. Allen Quennell is very sick in the Calgary Hospital.

Mr. Ewart Foster, Taylor, Pearson and Caeson, of Calgary spent Good Friday with his son's Mr. W. W. Brown.

Miss Lucille Bell arrived home from Calgary to spend her Easter holidays with her parents Mr. and Mrs. Geo. E. Bell. She was accompanied by Master Gordon Dunn.

Hugh Hamar of Royal Bank, High River spent Easter week and at the home of his parents Mr. and Mrs. H. Hamar.

On Thursday evening Arthur Brown received a very pleasant surprise in the form of a small party given by Mrs. McIntyre and her sister Mrs. McMann, at the residence of Mrs. McIntyre. The evening was spent playing whist, with the prizes going to Agnes Thorburn and Raymond Menard, while Hazel Robinson and Harvey Bogale qualified for the consolation. After the dining luncheon, the rest of the evening was spent in various games thoroughly enjoyed by all, in which contests also featured, Jean Parquharson and Arthur Brown carrying the honors with Bernard Thorburn in the second. Topping the fun was the feature of Arthur receiving the "royal bumps" just after midnight. These present were: Misses Jean Parquharson, Ruth McMillan, Allison Evans, Hazel Robinson, Marjorie and Helen McIntyre, Agnes Thorburn, and Messrs. Harvey Bogale, Raymond Menard, Bill and Bernard Thorburn, Forrest Brown, Arthur and Laurie Brown, Dr. McIntyre, Mr. Brown, Mr. and Mrs. House, Mr. McIntyre, and Mr. and Mrs. Muriel McMann.

Congratulations

To the citizens of Gleichen on their unanimous assent to the Irrigation By-law. We believe the coming years will prove this to be the finest step forward in Gleichen's history...

C. R. McIntyre,
Dentist.

Ancient Halls Brought To Antiques Exposition

Transported To New York City From Uxbridge, England

The carved oak hall in which commissioners of King Charles I. met, back in 1645 at Uxbridge, England, has been transplanted, panel by panel, to the International Antiques Exposition at Grand Central Palace.

The treaty room of the old Treaty House at Uxbridge, its carved oak stained by time, is rivalled by another room at the exhibition. It is from Buckhurst Castle, seat of the Earls of Warr. A pine-panelled room from Gray's Inn, London, England, is also reassembled.

There is furniture from many countries, ranging from medieval oak chests to 100-year-old Beidermeier just coming into vogue. Silver, jewels, and objects of art are included. Marion Powys will show a collection of royal lace, several Russian aristocrats are offering articles through dealers and pottery and plate made at the Imperial factory founded by Catherine The Great, is displayed.

SCHOOLGIRL CHIC

All Tingey models are created and sketched in Paris and the patterns are made in New York.

The most fascinating touches of lingerie, amusing and fantastic trims, collars and cuffs mark the new season's afternoon clothes. Naturally they affect young people's clothes as they do models for grown-ups.

A charming dress for a schoolgirl has been chosen for today, showing a new collar and cuff effect which is as attractive as it is becoming to the average young miss.

Here on a frock of fine mid blue broadcloth is a delightful collar and cuff set in soft pink crepe de chine. Buttons and blue edged buttonholes decorated the original, but real buttonholes are not absolutely necessary.

Sturdier schemes in, for instance, fine navy charmelaine with blue and white spotted, or white collar and cuffs would also be exceedingly smart.

This pattern may be obtained in sizes 14 to 20 and 34 to 38. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

New Giant Cunard Liner

Interior Decorations To Be Most Elaborate Of Any Vessel Afloat

Continued rapid progress is being made on the new giant Cunard liner of 73,000 tons which is at present under construction in the yards of John Brown & Company, at Clydebank, Scotland.

Details have reached the local offices of the Cunard Line with reference to a number of the plans for the interior decoration of the liner which up to the present is without a name.

Mr. Eric Reford, vice-president of the Robert Reford Company, and general manager of the Cunard Line in Canada, in discussing some of the features which will be part of the new Cunarder, mentioned the fact that she will have an exceedingly beautiful church and that it will be decorated in accordance with the traditions of English ecclesiastical art.

"The liner itself will have eight decks above the water line," he said, "and between the aft and the centre funnels will be built the largest dining room ever to be placed in an ocean liner."

"The boat deck itself will be 70 feet above the water line, and the tops of the funnels, which are forty feet across, about one hundred and thirty feet above. The boat deck is to be about 650 feet long and the promenade deck 720 feet long."

"I understand that the interior decoration of the Cunarder has not been settled, but I am sure that it will be the most elaborate that has ever been known on an ocean liner."

"It is fully expected that the construction of the hull will be well advanced by the spring," said Mr. Reford in closing.

Recipes For This Week

(By Betty Barclay)

DATE MUFFINS

2 cups special cake flour, sifted.
4 teaspoons baking powder.
1/2 teaspoon salt.
4 tablespoons sugar.
3/4 cup milk.
1 egg, well beaten.
4 tablespoons butter or other shortening, melted.
1 cup dates, seeded and sliced.
Sift flour once, measure, add baking powder, salt, and sugar, and sift again. Combine milk and egg and add to flour, beating until smooth. Add shortening and dates. Bake in greased muffin pans in moderate oven (375 degrees Fahrenheit), 30 minutes. Makes 18 small muffins.

SNOWFLAKE PUDDING

2 egg yolks, slightly beaten.
Dash of salt.
1/2 cup sugar.
2 cups milk, scalded.
1 envelope gelatine (1 tablespoon).
1 can (1 1/2 cups) coconut, southern style.
1 teaspoon vanilla.
2 egg whites, stiffly beaten.
1 1/2 cups fruit (canned grated pineapple, apple, berries or any fruit in season).
Combine egg yolk, salt, and sugar. Add a small amount of milk, stirring vigorously. Return to double boiler and cook until slightly thickened, stirring constantly. Pour a small amount of hot mixture over gelatine, stir until dissolved, and add to remainder of mixture. Cool. Fold in 1/2 cup coconut, flavoring, and egg whites. Pour over fruit. Sprinkle with remaining coconut. Chill until firm. Serves 8.

British Machines For U.S.

A British firm, the Wellman Smith Owen Engineering Corporation, Ltd., of Victoria Station House, S.W., has obtained a contract for the delivery of 1,000 tons of machinery to Pittsburgh, Pennsylvania, the heart of the American steel-producing country. It will mean the employment in England, of 600 men for six months. The contract is for machinery for the production of weldless steel tube.

Altitude And Power

As an aeroplane increases its altitude, its motor loses much of its power, experiments conducted by the United States Bureau of Standards show. Tests conducted revealed that at an altitude of 25,000 feet a motor which developed 410 horsepower on the ground only developed 100 horsepower at that height.

SIR OSWALD MOSLEY

Sir Oswald Mosley, well known in British society and politics, who recently made known his intention to form a new "National Socialist" party.

Airways Company

Issues First Report

Progress Made During Year Outlined By Chairman

History was written when Canada's leading transportation executives assembled in the offices of Canadian Airways, Limited, Montreal, to receive the first annual report of the new national trunk-line organization, presented by James A. Richardson, of Winnipeg, president. Sir Henry W. Thornton, chairman of the Canadian National Railways, and E. W. Beatty, chairman of the Canadian Pacific Railway, joint vice-presidents of Canadian Airways, attended the meeting.

Mr. Richardson presented a brief history of Canadian Airways, and then discussed at some length the balance sheet. The net operating revenues of the company to December 31, 1930—including 13 months for the western lines and 12 months for the eastern lines—were \$1,817,543. The net loss, after all charges—including depreciation amounting to \$418,332—was \$68,704.

Considering the sharp decrease in mining operations during the last half of the year particularly, and the depressed condition of business in general, with consequent loss of freight, express and passenger revenue, this loss was not unexpected, Mr. Richardson explained. The new organization was not functioning until the last month of the year, so none of the economies which are to be expected from mergers, obtained through co-ordination of effort, exchange of ideas, etc., were actually effected until the year had ended.

Nearly 2,000,000 miles were flown by planes of western and eastern lines in the period under review, the exact total being 1,968,124. The company carried 333,913 pounds of mail, 15,278 pounds of freight and express on air mail lines, and 486,161 pounds of freight and express on other lines, bringing the total to 835,353 in the year. The number of passengers transported was 3,645 on mail lines, and 5,255 on other lines, making a grand total of 8,900. An efficiency of 87.9 per cent. was maintained on both sections, western lines having achieved a percentage of 92.7 and eastern of 82.5.

Everybody's Queer

Call a woman a chick and she smiles; call her a hen and she howls. Call a young woman a witch and she is pleased; call an old woman a witch and she is indignant. Call a girl a kitten and she likes it; call a woman a cat and she hates you. Women are queer. Call a man a gay dog and you flatter him; call him a pup, a hound, or a cur, and he tries to alter the map of your face. He won't mind being called a bull or a bear, yet he resents being called a calf or cub. Men are queer.

Used Viking Sailboat

A Viking sailboat named "Roald Amundsen," an exact copy of the boats used by Eric the Red, and other early explorers, made the trip across the ocean from Palos, Spain, to Havana, Cuba, in 42 days during the months of March and April, 1930.

New Baggage Device

A device by which baggage may be unloaded and taken on a plane in flight has been developed. Dropping a load into a chute, the plane's trail line is hooked onto the baggage which is automatically shot forward at the speed the plane is travelling.

The boring methods of ship-worms have given British engineers some points on how to bore tunnels so as to keep out water.

March Forward With Canada

Prizes Offered For Best Designs Conveying Message That Dominion Is Forging Ahead

To the Canadian artist whose completed design best conveys the message that Canada is forging ahead, that economic handicaps resulting from world conditions are being overcome, and that Canadian prosperity can well be fostered by the purchase of Canadian-made products, a group of the Dominion's leading industries is offering an award of \$1,000 in cash.

To seven other artists selected by the judges, additional awards of \$100 each will be made.

Details were announced by W. F. Prendergast, chairman of the committee representing the sponsors. "March forward with Canada" is the basic theme, and the competition is one item in a "prosperity drive" which Canadian manufacturers plan to inaugurate. The awards are offered for competition to all Canadian artists, and each entrant may submit as many designs as he desires. The designs should be miniature color sketches suitable for general reproduction.

From the miniatures entered eight artists will be asked by the judges to submit full colour drawings. The designs are to include no advertising for individual firms or industries but to be applicable to Canadian business and industry in general.

Not Interested In Lesson

Little Kindergarten Pupil Was Just Plain Lonesome

A patient kindergarten teacher was trying to explain the difference between what is round and what is square to her impatient pupils one day, using a ball and a playing block. She would pick up the ball and say, slowly and distinctly: "This is round." Then she would put it down, pick up the block, and say: "This is square." Heroically she repeated this exercise seven or eight times. "This is round, this is square. Now are there any questions?" One little boy who had just joined the class raised his hand, and she nodded to him. "Can I sit in your lap?" he asked.

Fourth Best Customer

Canada was Great Britain's fourth best customer in 1930, having advanced one place from the previous year, it was announced by the Department of Trade and Commerce after a report had been received from the British Board of Trade.

Canadian Geographical Society

Dr. Charles Camsell, deputy minister of mines, was re-elected president of the Canadian Geographical Society at the recent annual meeting, the first and second vice-presidents being, respectively, C. G. Gowan and Dr. J. Macintosh Bell.

Geologists have found that Cape Cod, Massachusetts, is sandy to a depth of 300 feet in some places.

Visitors To Japan

Can Now Land In Flowery Kingdom Without Special Visa On Passport

Through the efforts of the Canadian Legation at Tokyo, a privilege of great convenience, hitherto not enjoyed, has been made available for Canadian travellers passing through Japan, enabling them to land in that country for temporary purposes without having on their passports a visa issued by a Japanese consul in Canada. They must, however, possess a valid Canadian passport.

Hitherto, a through-bound Canadian traveller, if his passport did not bear a Japanese visa, was unable to land in Yokohama or other Japanese ports even for an hour's shopping—a cause of constant inconvenience.

The hardship of this was pointed out to the Japanese foreign office by the Canadian Legation, suggesting that it would be more practical and convenient for travellers—whom Japan is now so eager to attract—if the formality of requiring a Japanese consular visa for temporary landing were dispensed with. It was pointed out that Japanese visitors to Canada enjoyed such a privilege.

The Japanese foreign office agreed with this view. The new rule does not affect the requirements for permanent landing by Canadians, which remain in effect.

Scientist Makes Discovery

Chicago Professor Says Men and Women Snore Alike

Male and female snores are the same. Dr. Donald A. Laird, of Colgate University, who has stayed awake many hours studying how other people sleep, is the authority for this information.

Snoring, he said, in an address, is a saxophone type of noise, not related to vocal sounds, and it is impossible to distinguish between male and female snores.

Dr. Laird, who is director of the Colgate psychological laboratory, also gave his audience a formula for the best way to sleep. Here it is:

Get into a green or blue bedroom, adorn yourself in pajamas of the same hue, see that there are heavy rugs on the floor and then hop into a bed that has springs that are not too springy and a mattress that is neither too soft nor too hard.

"Our experiments," he said, "demonstrate that it is even best for a person to sleep alone in the room. Sleep units, occurring about every twenty minutes and marked by a restless movement or the sleeper turning over—are fewer when no one else is in the room. The other person's movements tend to disturb."

A Lofly Weather Station

The loftiest weather station in the United States is located on the top of Mount Rose, Nevada, 10,800 feet above sea level. It is equipped with an automatic weather indicator which can run for two months without attention.

The Value Of Advertising

Three General Types Outlined By President Of Montreal Club

It is no longer enough to make a better mouse-trap, one must also advertise it, W. G. McGruther, president of the Montreal Advertising Club, stated in outlining the change that has come about in trade and industry in the present century, especially in regard to advertising, to students of the school of commerce McGill University, at a luncheon meeting. Three general types of advertising were outlined. The first was designed to bring customers to a store for a particular product, such as a specific brand of cigarettes; the second to lower the buyer's resistance when the merchant offered merchandise bearing an established trade name, and the third, institutional advertising had as its purpose the "selling" of the firm as well as the product.

If baby has COLIC

A CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's a need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

Fletcher's CASTORIA

Make Your Windows Pay

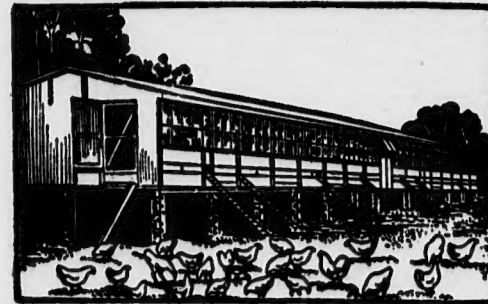

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Political Leaders In Quebec Federal Politics Heard In Lively Debate

Ottawa, Ont.—Political leaders in Quebec federal politics swung into action in the House of Commons. In continued debate on the address in reply to the speech from the Throne, Hon. Arthur Sauve, postmaster-general, and Hon. Ernest Lapointe, former minister of justice, expressed divergent views.

Mr. Sauve spoke first. It was his initial speech in the House of Commons, and his reception, especially when he spoke at some length in English, was hearty. He defended the government, reviewed what had been done to aid the unemployed and assist the farmer, and asked for co-operation of all parties to make the coming economic conference a success. He also remarked that, in denouncing the action of the government in respect to Russia, the leader of the opposition was actually denouncing the Quebec government.

Hon. Ernest Lapointe, veteran of 24 years in parliament, found in the last Imperial Conference, ample reason for criticism of the government. "Mr. Lapointe, who has himself represented Canada at Imperial Conferences, censured Premier R. B. Bennett for the mercenary spirit which he claimed had animated him in his negotiations.

"The British Commonwealth is an idea; it is a soul," asserted Mr. Lapointe. "To have it on a mercenary foundation is to court disaster. The life of sentiment is thin, but it is strong. It may seem weak, it may be invisible to those who cannot see anything outside a ledger, but this life has proven equal to the test to which it has always been put in periods of trouble and difficulty."

Mr. Lapointe had criticism for Mr. Bennett in the ground of interference in British domestic policy.

"To force protection upon Britain, as the prime minister of Canada tried to do, was not only basing the Empire on an economic fallacy, but it was interfering in the most direct way with the domestic policy of the United Kingdom," charged the former minister of justice.

Miss Agnes MacPhail, Progressive member for Southeast Grey, and the only woman member of the House of Commons, followed Mr. Lapointe.

In his speech Mr. Sauve had made direct reference to Miss MacPhail. He said that the arguments advanced by her in speeches had "been of such a subtle character as to induce me to excuse her for the stand she has taken toward resistance by the province of Quebec to the granting of the franchise to women."

"In fact," added Mr. Sauve, "I am coming more and more to an acceptance of the idea of the granting of this franchise."

Death Of Timothy Realy

Irish Nationalist Statesman Dies In Dublin, Ireland

Dublin, Irish Free State.—Timothy Michael Realy, over whose bitter-sweet sallies in the House of Commons old-timers still chuckle, died, March 26, 1931, at the age of 75.

He was the first governor of the Irish Free State, but he will be remembered longer as one of the most brilliant parliamentary speakers who ever galvanized the House of Commons into action.

In the old days before the Free State had its own parliament, he used to sit in his corner of the House, his silk hat tipped down over his nose, pretending not to listen. Then he would get up to his feet and begin one of those characteristic speeches in which the vitriol of his sarcasm was overlaid with the honey of his Irish humor.

He had been sick for weeks, and those close to him knew the end was near, but his death, nevertheless, was a shock to those who knew him.

Well-To-Do Farmers

Toronto, Ont.—The well-to-do middle class farmer had by no means disappeared. Hon. Duncan Marshall, former Minister of Agriculture in Alberta, told a meeting of advertisers and salesmen here when discussing farming conditions in western Canada.

He believed that present difficulties would be overcome by the farmers. Generous loans to farmers by bankers at low rates of interest were a necessity, however, he said.

W. N. U. 1883

Disorders In India

Cawnpore Troops Shoot Down 30 Rioting Nationalists

Karachi, India.—Tumult broke out again in India as Mahatma Gandhi, here for the Nationalist congress meeting, was jeered by Communists, and troops at Cawnpore shot down at least 30 rioting Nationalists.

The disorders grew out of the execution last week of three Indians convicted of the murder of a 21-year-old police official in 1928. Gandhi was taken off a train 12 miles outside of the town, but the thousands gathered here for the congress meeting spotted him as he rode into town in an automobile.

A group of 30 or more, known to be of Communist leaning, made for him with jeers and one even made as though to attack the frail little man with a flag staff. Some carried a tray with a gruesome mess of mud and blood.

"Here is the blood of our brothers who were murdered," they cried, referring to the three executed Indians. "Take it back with your truce to Delhi."

Gandhi's men drove off the assailants, and there were cheers for Mahatma.

The day at Cawnpore was even more serious. Rioting began during the night when Moslem shop-keepers refused to close their stores under a general strike order by the congress men. Troops came out when the fighting got serious, and before the worst was over, 30 had been killed, and at least 100 injured.

This trouble too, grew out of the executions.

Must Serve Sentence

Sixteen-Year-Old Farm Boy Falls In Appeal To Higher Court

Toronto, Ont.—Robert Kitowski, 16-year-old farm boy, must serve his sentence of five years at the Stoney Mountain penitentiary and receive 20 lashes as imposed by Magistrate Cruso for the holding-up and robbing of the Dominion Bank at Fort Frances, on February 11 last. This was the decision of the First Appellate Court of Ontario, at Osgoode Hall, Toronto.

Following an earnest plea for "a more humane punishment" from A. A. MacDonald, counsel for the young prisoner.

Youthfulness of the prisoner which brought forth a "popular clamor" following the sentence, did not appeal to the first divisional court, the chief justice, Sir William Mulock, declared in announcing their judgment.

Fix Tariff Value On Gasoline

Ottawa, Ont.—Values for duty purposes have been fixed by Hon. E. B. Ryckman, Minister of National Revenue, on refined gasoline entering Canada from the United States. In a bulletin issued recently to customs and excise officers, values for import purposes were placed on gasoline from various refining areas across the border. The new regulations come into effect immediately.

Drill For Oil

Winnipeg, Man.—It is understood here that an oil company, name unknown, will expend \$250,000 in testing property in the town of St. Boniface, adjacent to Winnipeg, to ascertain if oil exists in the district. It was reported that a 60-day option has been let by the St. Boniface council on a block of 14 acres at a price of \$2,000 an acre.

Followed Nurse Cavell

Brussels, Belgium.—It was belatedly learned here that Miss Anne Scott-James, 56, who gained fame as a nurse in the Great War, died March 21. Miss Scott-James assumed the mantle of the English nurse, Edith Cavell, shot as a spy by the Germans during the war. Following Miss Cavell's execution, she assisted Allied soldiers to cross the Dutch frontier.

Will Entertain Governor-General

Ottawa, Ont.—Canada's new governor-general—the Earl of Beasborough—will be the guest of honor on April 8, at a dinner tendered by Premier R. B. Bennett. Members of the government, the leader of the opposition, and members of the privy council will attend the function.

Sports will be featured at this year's fair at Cologne, Germany.

Man Without a Country

Department Of Immigration Decides To Admit Radunski To Canada

Ottawa, Ont.—John Radunski, referred to as the man without a country, will be admitted to Canada, the Department of Immigration has decided. When he was stopped at the Detroit-Windsor border some weeks ago, his case excited considerable public comment because, not only did the United States refuse him entry, but so did Canada. The order permitting him to enter this country went forward recently.

Radunski came to Canada in 1914. In 1923 he went to United States, where he married an American woman. They had two children, whom, after his wife's death, Radunski sent to Canada to the home of his parents. It was when he sought to follow them back to this country that he was stopped by immigration authorities.

SIR JOSIAH STAMP APPOINTED HEAD OF GRAIN INQUIRY

Ottawa, Ont.—One of Britain's leading economic experts, Sir Josiah Stamp, was recently named as head of the royal commission to inquire into grain trading in Canada. Premier R. B. Bennett told members of the House of Commons that Sir Josiah will sail this week for Canada.

It was known that the British economist had been invited to represent the Dominion Government, but the recent announcement carried the first intimation that he had accepted the post. The royal commission is to consist of three members, one of whom will represent the Grain Exchange and another is to be chosen by the prairie provinces to represent the farmers.

Rumors have associated the name of Premier J. E. Brownlee with the position of grain growers' representative, but Mr. Brownlee has denied that he would accept the post.

Sir Josiah Stamp has for many years been regarded as an outstanding expert in financial matters. He has had a distinguished academic career and has frequently represented the British Government on financial commissions. In 1919 he was member of the British royal commission on income tax, in 1924 he was member of the committee on taxes and national debt, and in the same year was British representative on the Dawes reparation commission. His most recent task has been to seek means of accomplishing economic co-ordination of British railways.

Appointment of the royal commission has followed expressions of opinion in Western Canada that trading in grain futures is detrimental to the best interests of the producers.

Present indications are that work of the commission will be confined to an investigation of this subject, although it appears possible the scope of the inquiry may be extended to include whole questions of marketing of the wheat crop.

Less Unemployed

London, England.—The number of unemployed persons in Great Britain on March 16, was announced by the government recently, as 2,639,633, a decrease of 52,104 under the previous month. The total figure is 1,017,875, more than at the same time last year.

SOUTH AFRICAN GOVERNOR

Earl of Clarendon, newly appointed governor-general of South Africa, as seen in his official uniform. Lord Hyde, the Earl of Clarendon, was a fruit farmer, near Pickering, Ont., in 1912, when both he and Lady Hyde lived in an ordinary farm house.—Copyright by Acme Newspictures.

Express Train Leaves Track

One Life Lost and Fifteen Injured In Wreck Near Swift Current

Winnipeg, Man.—Swift travelling Canadian Pacific Railway passenger train No. 3, westbound, hit a broken rail near Swift Current, Sask., and five cars, including four sleepers, plunged from the rails, down a 15-foot embankment.

There was one fatality—a 67-year-old Cleveland man, Manning F. Fisher, who with his family was en route to Vancouver from where he was to have sailed for China on a holiday. His death was attributed to shock. He died shortly after the derailment. Mrs. Fisher and a 23-year-old son escaped injury.

Thirteen other passengers occupants of sleepers and two members of the dining car staff, were cut and bruised when thrown from their berths. All escaped serious injury.

Regina Winter Fair

Three Grand Champion and Reserve Champion Stallions Are Named

Regina, Sask.—Three grand champion stallions were named at the Regina Winter Fair. These were: Clydesdales, "Lochinvar," owned by John Falconer, of Govan, Sask.; Percherons, "Colmar," owned by C. M. Rear, of Regina, Sask.; Belgians, "Goliath," owned by C. M. Rear.

The reserve championship in Clydesdale stallions went to H. Black, of Belle Plaine, with "Caradoc Footprint"; in Percherons, to C. M. Rear, with "Rainy River Charles"; and in Belgians, to R. Thomas, of Grandora, with "Paragon Bill."

R. Thomas was adjudged to have the best gelding in the show with a Clydesdale, winning over a Percheron, owned by H. Black.

No Samples Yet

Edmonton, Alberta.—"Not a single flake of platinum has been received yet for test purposes," declared Dr. J. A. Allan, head of the department of geology at the University of Alberta, when asked regarding reports of a strike at Obed, on the C.N.R., west of Edson.

MELODY MIKE FAN MAIL

From the far northern prairies, from city, town, village, isolated farm house, right across the Dominion from Halifax to Victoria, letters are pouring into Canadian Pacific Railway radio offices, at Montreal, from admirers of the genial old soul who sends out his message of goodwill and kindly humor every Monday night. In one day in March, no less than 1,361 such letters were received and from 15,000 in a month, the figure has risen to close on 40,000. Photograph shows a portion of the radio department staff dealing with this huge fan mail as it comes in each day. The Melody Mike feature is declared by competent judges to be one of the most popular radio offerings on the continent.

May Increase Postal Rates On Newspapers

To Help Lower Deficit Of Post Office Department

Ottawa, Ont.—Voicing a protest against the projected increase of postal charges on second class mail matter, a delegation of over 20 members of the Canadian National Newspapers and Periodicals Association conferred here with Hon. Arthur Sauve, postmaster-general.

The government has had before it for some time the proposal to increase the mail rates on second class mail matter, under which category are included newspapers and periodicals. For the current fiscal year the deficit of the post office department will likely range between five and six million dollars, and the proposal to raise the rate on newspapers has been advanced in an effort to overcome some of that deficit.

Would Repeal Dry Law

Illinois Senate Passes Bill Repealing Enforcement

Springfield, Ill.—The Illinois Senate recently passed the bill repealing the state's prohibition enforcement laws. The measure, already passed by the House, now goes to the governor. The vote was 26 to 24.

The bill would repeal the state prohibition law under the Search and Seizure Act. In effect, it would withdraw all state support from the Federal Government in fighting illicit manufacture and traffic in intoxicating liquor.

MANITOBA POOL ELEVATOR PROBE IS UNDER WAY

Winnipeg, Man.—Surrounded by prominent counsel, including T. J. Murray, K.C., authority on the legal aspects of co-operative marketing, E. K. Williams, K.C., commenced a royal commission investigation into the operations of the Manitoba Pool Elevators Limited.

Procedure to be adopted in presentation of evidence has been settled. Commissioner Williams gave a compromise ruling which will permit Pool counsel to present documentary evidence, and, in special cases, evidence of company officers in explanation of financial reports submitted.

It had been the intention of Mr. Murray and his associate counsel, Travers Sweetman, K.C., to present oral testimony on each document submitted, but this was objected to by A. B. Hudson, K.C., representing James R. Murray, Winnipeg grain authority, whose charges made to Premier John Bracken brought about the appointment of the commissioner.

Under the compromise ruling, agreed to by all counsel, the Pool elevators will file documents, and opposing counsel will be permitted immediate cross-examination of witnesses. The same ruling will apply when witnesses for Mr. Murray testify on the filing of documentary evidence.

Mr. Murray, who charged extravagance in the operation of pool elevators, and under-grading to the detriment of the farmer shareholders, was in attendance at the sessions.

In the country there are 11,000 farmer shareholders, operating 156 country elevators, who are vitally interested in the probe, which is expected to last at least three weeks.

Both sides made clear that "a complete picture" of the pool elevators operations must be presented.

Mr. Murray, senior counsel for the pool, feared it was the intention of Mr. Hudson to call officers and employees of the elevators only to substantiate the charges, and not to bring out the complete facts relevant to the whole case.

A wrong impression might be created with the examination of only one document or witness, said Mr. Murray. Incomplete examination might at least cause suspicion, and with keen rivalry existing between pool and non-pool elevator agents, lead to the circulation of propaganda calculated to break the confidence of shareholders.

"Confidence of shareholders is the life blood of the Pool Elevators, Limited," he said. "It must be maintained."

J. T. Thorson, K.C., associated with Mr. Hudson, declared it was not intended to create any unnecessary disturbance in the minds of shareholders. Everything must be presented in detail, not summaries, and not piecemeal.

Establishment Of A Permanent Canadian Marketing Board Urged

To Dispose Of Wheat

Senator Borah Would Donate Surplus Wheat In United States To China

Washington, D.C.—Old suggestion that the surplus wheat held by the National Grain Stabilization Corporation, amounting to over 200,000,000 bushels, should be turned over to China, was made by Senator William E. Borah.

Such action would require an act of congress. Wheat held by the corporation has been bought and paid for, and the policy of the Farm Board is that it shall not be given away.

Borah's idea was that a gift of the wheat to China would create an appetite for wheat bread among the 400,000,000 Chinese which would result in largely increasing the market for wheat in that country.

SUNDAY SCHOOL LESSON

APRIL 5

EASTER LESSON.

THE RESURRECTION

Golden Text: "Now hath Christ been raised from the dead, the first-fruits of them that are asleep." — 1 Corinthians 15:20.

Lesson: 1 Corinthians 15:1-8, 50-58.

Explanations and Comments

The Resurrection Of Christ the Most Vital Of All the Doctrines Of the Christian Faith, verses 1-4.—Paul reminds his readers, the Corinthians, of his teaching during his work among them, of the gospel, the good news, which they heard from him, on which their faith was grounded, by which they were saved, that is, "in the way of salvation, by faith in the crucified and risen Saviour," if they held fast to the word as he had declared it unto them, and had not believed in vain, "without consideration, and so without stability." "Unless, indeed, your faith was all haphazard," is Moffatt's translation. Paul's sentences are usually very involved; the next four verses form one sentence. First of all, as the most important of all the good tidings which I declared unto you, he writes, I told you that which I also had learned (probably from Peter and James, on his visit to Jerusalem recorded in Acts 9:27, 28), that Christ died to atone for our sins, in fulfillment of the Scriptures; that He was buried and was raised on the third day.

O vanquished grave of Jesus whose chill could work no change upon His heart!

O deep, deep grave of Jesus whose depths can hide a whole world's sin!

O glorious grave of Jesus through whose gloom lies the pathway to Immortal Life!"

—Ralph Connor.

The Evidence For the Resurrection, verses 5-8.—Here follows the oldest account of the appearances of the Risen Christ. He appeared to Peter; then to the Twelve (Paul keeps the symbolical number, though Judas was dead and Thomas was not present at the first appearance); then to more than five hundred at once (probably on the mountain in Galilee, Matthew 28:16, 17), the greater number of whom are still alive—and you can have their direct testimony, if you wish, is the inference—but some are fallen asleep (twenty-five years, at least, had passed since the resurrection of Christ); then He appeared to James (the brother of Jesus, Acts 15:13; Galatians 1:19); then last of all, as to a child untimely born, He appeared to Paul also (Acts 9).

The Resurrection Of the Dead, verses 50-58.—Human nature in its habit of flesh and blood cannot take possession of the Kingdom of God; nor does corruption take possession of incorruption. "The argument is that such a spiritual body as he has been speaking of is absolutely necessary in the Kingdom of God." Behold, I tell you a mystery: some will be living at the last trump (1 Thessalonians 4:16; Matthew 24:31; Revelation 11:15), when Christ shall come again, and they will be changed in a moment, in the twinkling of an eye, at the last trumpet-call; and the dead shall be raised incorruptible, and we shall be changed. Paul hoped for the return of Christ during his own lifetime.

When this has taken place, when this corruptible shall have put on incorruption, when the glorious body is received, then will the resurrection triumph over sin and death, they shall be no more, and law shall be no more, for it will not be necessary. Thanks be to God who gives us the victory through our Lord Jesus Christ. "The victory is ours, thank God! He makes it ours by our Lord Jesus Christ," Moffatt's translation. Wherefore, let us be steadfast, unmovable, persevering in the work of the Lord, for we know that it will not be thrown away.

A church just constructed at Dortmund, in Germany, has a concrete framework and walls of glass of different colors.

Winnipeg, Man.—Establishment of a permanent Canadian marketing board was urged in the Manitoba legislature by Hon. R. A. Hoey, minister of education. Answering criticism of wheat pool operations, Mr. Hoey contended that a permanent markets board would have a vital and direct relationship to the recovery of agriculture in the west.

He also proposed, in speaking on the second reading debate on ratification of government pool loan guarantees that quality production should be insisted on and that products should be standardized from coast to coast.

Cash payment to the banks for the government's guarantee of the Manitoba Wheat Pool's indebtedness was urged by W. Sanford Evans (Ind. Con.), Winnipeg. He advised the government to float a \$2,200,000 bond issue and pay the banks in cash rather than to seek to carry the overdraft over a period of years.

Under such a plan, believed Mr. Evans, the pools would get a new start and would profit by their lessons of the past, altering the policy of speculating in futures, which, he contended, had been the pools' undoing. Most severe threat to the world market, at present, he commented, lay in the grain to be released from the United States following the farm board's decision to end its stabilization policy.

Mr. Hoey, minister of education, replied spiritedly to Mr. Evans' statements, reviewing the formation of the pools and quoting Premier R. B. Bennett as saying, at Regina, that the pools had followed the wisest policy under the circumstances. In coming to the government for aid in adversity, said Mr. Hoey, farmers were doing only what had been done with extraordinary success by many other interests.

Tourist Traffic Slightly Less

But Figures For 1930 Place Value At \$280,000,000

Ottawa, Ont.—Despite falling off from 1929 tourist traffic still remains a decidedly prolific source of income in Canada. Figures for 1930, estimated by the Dominion Bureau of Statistics, place the value of tourist traffic at \$280,000,000. This substantial figure, in the face of far-flung economic depression, was only \$29,000,000 less than 1929.

Automobile tourists from the United States increased in numbers, but apparently did not spend as much money. The estimated expenditure was \$202,409,000 as compared with \$215,577,000 in 1929. The conclusion reached by the mathematicians at the Bureau of Statistics is that the relative cheapness of a motor trip through Canadian highways had appeal for those who in more prosperous times might have been inquisitive about the beauty of Monte Carlo. Total tourists from the United States numbered 5,400,000 as against 4,508,000.

Canadian tourists abroad also were watching their pocketbooks. Automobiles carried tourists to the United States who parted with \$63,489,000, according to the estimate. This compared with 65,055,000 in the previous year. Total expenditures abroad of all Canadians is placed at \$113,000,000 as against \$122,000,000 in the year of booming stock quotations.

Temperance Forces Defeated

London, England.—Rallying after their recent defeat in attempting to introduce prohibition into Great Britain by act of Parliament, the temperance forces sought to curtail liquor advertising which flares over towns and country throughout the Isles, but the House of Commons rejected the move by a vote of 127 to 112.

No Aid For Germany

Paris, France.—Denunciation of the commercial treaty with Germany and a decision to abstain from all financial aid constitutes the possible policy of France toward Germany if the persists in carrying out an economic pact with Austria, the Associated Press was informed in official quarters.

Child Has Narrow Escape

Welland, Ont.—A .45 calibre bullet, fired up in the air by an unknown person, dropped through the roof of a house occupied by Mr. and Mrs. Florian Oberyk, pierced the bedroom ceiling and landed on the blanket of the baby's crib. The bullet missed the child by inches.

Two Outstanding Triumphs!

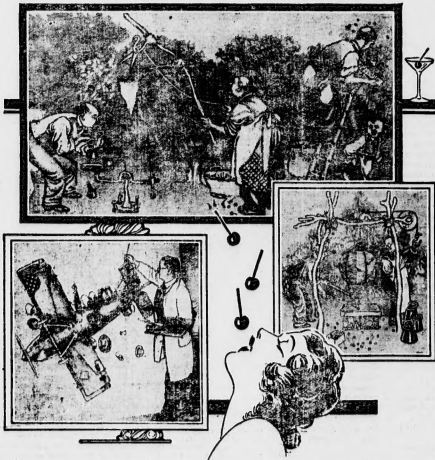

1. The 100 per cent victory last Thursday for the Old Originals, in their three year fight for Irrigation.

2. The complete killing of the High Cost of Living in this town and district by your local A. G. Store.

Imagination Runs Riot

When he launched the 42,500 ton Canadian Pacific liner Empress of Britain, H.R.H., the Prince of Wales, referring to the knickerbocker bar on the cocktail bar of that magnificent new ship, is to be known—said that its frequenters "can let their imagination run riot in a row, and amid the fantastic humour of Mr. Heath Robinson."

The Prince referred to the announcement that Britain's foremost humourous artist has been given a free hand to decorate that room on the new liner which is to make its low to Canada June 22nd next. Developing a humorous legend of the cocktail of its own invention, W. Heath Robinson, who is shown above at work on some of the panels, has prepared a decorative scheme that extols the virtues of the cocktail and depicts ingenious machinery employed in its manufacture.

Heath Robinson's ideas of the latest labour-saving machinery in connection with the selection and preparation of cherries for cocktail embellishment are shown together with the "Loudspeaker Safety Apparatus," a direct descendant of the mythical cocktail bird. The ceiling decoration depicts the uplifting powers of an appetizer. These, and other drawings will appear on the walls and ceiling of the room.

Town and District News

Mrs. C. Thompson and son Clifford motored to Edmonton on Monday.

Mr. Robt. Hamilton of Stettin was a visitor in Gleichen over the week end.

Miss Phillis Biverson of Calgary, is spending Easter holidays at her home in Gleichen.

Mr. and Mrs. Don Patterson of Calgary, are visiting Mrs. Patterson's parents Mr. and Mrs. Sanders.

Mr. and Mrs. Joe Plante and family of Coleman, are visiting Mr. Plante's parents Mr. and Mrs. Tom Plante.

Miss Marie McLean of Calgary is spending the Easter holiday at the home of her parents, Mr. and Mrs. David McLean.

On April 10th a wheel drive in aid of the hockey boys will take place at Mrs. McConnell's home, when a good time is assured to one and all.

KANT KICK KLUB OF ORAIGANTLER MAKING PROGRESS

The manager of the Kant Kick Klub has an interview with Mr. Baithamier, the hotel architect on the construction of the club house, and the best location for the same after a lengthy interview it was decided to have it built on the south end of the Dutchman's slough. At a recent meeting it was decided to let Bill Pettit and J. Sheets have charge of all construction. There will be 12 good sized rooms in all and an addition for a sort of factory with a large auditorium to make hamburger and sausage kraut. Bill Pettit proposing to buy 10 acres under the ditch to grow peas that in the winter time the club would have on hand good warm pea soup. Bill put in a good many years in Crawling Valley, and as chief cook to some of the leading ranch men is well versed in making lamb stew and home brew. This no doubt will be very pleasing to some of the Gleichen duck shooters. Dutchman's slough is one of their favorite shooting spots. Mrs. Fred Dankwerth has undertaken to be the first housekeeper with Fred as assistant, followed by two others for the next three months. The club has some splendid musical talent and Capt. Grant says we will have a gathering of the club once a year. H. B. Grant, Deer Lodge farm is to have full charge of the finances. L. A. Davidson has been put in an application already for the dogs for his hogs, but L. Selgeous says it should be tendered first. C. Shores concurring in this B. Scribner is to attend all dances and call the quadrille. When the club is about ready for opening all the surrounding district, will be notified. The opening ceremony will be performed by H. H. Ellis who will open same with a gold key, which will be presented to him for remembering the Great antler district. Harold Sheet promptly reminded all that we would have to make application for beer license this seconded by Harry Matson and Henry Dankwerth put in an application to drill a well which was granted so everyone is satisfied with the outcome of the meeting. It is proposed to send some of the members to Gleichen, Cluny, Nanaka, Standard and Rockyford to ask citizens for donations for the new building. The site being as central among the different sloughs. Most of the duck hunters come from the above towns. We are sure they would be very glad to drop in for refreshments, rest their weary limbs and swap yarns.

REGULAR MEETING

regular representatives from the Municipal Districts and himself for a full and frank discussion of the situation.

Councillor Thorson moved that Mr. McPherson, minister of Public Works be advised that the council of the M. D. of Blackfoot, No. 218, favor having the digging of pits on road surveys, which are compulsory at present, made optional.

Town & District

R. W. Taylor who supposedly was going to vote against the irrigation has planted nine trees since the by-law has passed.

Last week a light fall of snow fell in Gleichen and to the northwest, but across the river at Arrowwood and to the south from it to twelve inches of snow fell. Last night more snow and rain fell but by morning most of it around Gleichen had disappeared, and the sun shone brightly today.

The Louis Olson, of Evesham, died Sunday night, the funeral taking place Tuesday afternoon will be held at the home of Mrs. Olson leave a wife and child in Edmonton.

Clyde House, of Cavell, Valley rode to Gleichen on horse back, Tuesday, to spend a day visiting his parents Mr. and Mrs. G. House.

Page: Henry Schnepf, "Henry" we are seriously thinking of engaging your big truck to transfer our money to the other bank."

The airplane from Calgary that landed here in Good Friday, was not very successful in taking up passengers.

For good home made meals, light lunches, refreshments of all kinds ice cream, visit the Rose Tea Room, 1/2 Mr. and Mrs. N. Hiddell and family of Gleichen, moved last week to the Arrowwood district, and are located to R. B. Harvey farm.

They will be missed very much from Gleichen. The firemen's annual ball held Easter Monday, was not well attended as was expected. However those present spent an enjoyable evening. It is expected the prize and loss will be nil.

Chris Christensen, rancher of Duchesne was in town for a few days last week meeting old friends.

Pete Downey Jr. was in High River last week visiting with his uncle.

Master Campbell Evans spent the past week in Calgary visiting his cousin Jack Stubbak.

Miss Nora Downey is in High River for the Easter holidays.

Some of the farmers were on the land last week for a day or so but the snow and rain called a halt to it.

High Bates left Sunday for Kimberley, B. C. where he has accepted a position as mechanic in a garage there.

His wife and family will follow shortly.

The auction sale of farm implements, tools, etc. of the W. Bell estate, which took place last Friday proved to be very good. T. H. Beach was the auctioneer.

Now that we are going to have irrigation a number of people intend to put bees in their back yards.

J. O. Bogache is going into the chicken raising business on a rather large scale. He has moved the small building, that was situated behind his implement warehouse, onto his farm.

This building used to be the office of the Stuart Lumber Co., who ceased to do business in Gleichen some 20 years ago. Many a Gleichen house was built in this house when A. J. Matney was agent who now lives in Cranbrook, B. C.

Cons. Batts regrets that all car owners have not yet got their car license so do. Three months of this year has slipped by and all have had plenty of time to get a license. Do not impose too much on the C. establishes generosity.

When anybody is visiting you, or if you go somewhere be sure and let the Call know about it for it is new and we appreciate it very much to get these items. If the public will cooperate and give us any news they may have it help to make a newsy paper. Don't be shy about this. Our phone number is 12.

Jack Deporter of Taber, spent the weekend visiting at the home of Mr. and Mrs. Cook.

Miss Irene McNeill of St. Albert, Miss M. Milne of Lethbridge, were guests for a few days at Mr. and Mrs. J. Cook, Mrs. Deporter and Miss Pauline Wright of Calgary are spending the week at the home of Mr. and Mrs. A. Gatta.

Miss Sara Cook is at present visiting friends at Nanton and Lethbridge.

Miss Irene McNeill of St. Albert, Miss M. Milne of Lethbridge, were guests for a few days at Mr. and Mrs. J. Cook, Mrs. Deporter and Miss Pauline Wright of Calgary are spending the week at the home of Mr. and Mrs. A. Gatta.

distance of eighteen feet, it means a constant battle of wit between man and beast.

These carnivorous animals roam the plains of Tanganyika, "the Valley of Lions," in great numbers, from three to seven.

The only human tribe who dares to molest them are the Masai of Northern Kenya, who are of the cattle raising tribe of the cattle raising tribe of that region.

These warriors, armed with spear and shield, go in search for the man-eating animals and pictures of them they form a ring of death and elation in their foe are shown in "Africa Speaks."

TENNIS SEASON HAS BEGUN HERE

The tennis season of the Gleichen Tennis Club has been opened with the new executive committee preparing for the summer activities. The officials appointed for 1941 are the following: Mrs. L. Sather, president, Don Swain, vice-president, Miss K. Lewis, secretary, J. P. MacCallum, Miss Stubb, Gerald Yates, Max Yates.

The courts have been extended to the full length of the lot and with a length of 125 feet will give ample room at each end, for playing back of ball-line. Red shale has been brought to Gleichen at considerable cost from Carbon. The same will be applied as soon as some more is available either from rainfall or irrigation so that it can be properly rolled into the ground. The courts are now entirely closed in as the backdrops are much higher than in previous years. The appearance of the grounds has been much improved by the construction of the new tennis and since irrigation is now established it will be possible to keep the play-grounds in almost perfect condition. With trees growing along the north side of the lots entire cuts will be an asset to the town of Gleichen which will be able to boast of the finest tennis courts of the district. It is expected to have very keen competition among club members and also to have inter-town tournaments arranged for this season. The membership fee has been set at \$5.00 per regular member and \$2.00 for students. Students have the privilege of playing every day until 5 p.m. including Saturdays and the summer holidays, with the exception of the 24th of May and the 1st of July when the courts will be reserved for regular members. The fees can be procured from Miss K. Lewis or at the office of Mrs. MacCallum & Sutherland.

Labour cost only for setting a column of type by typesetting machine is \$4.00. Added to that, somebody has to be paid for gathering the news, the paper on which it is printed and the types, work, mailing, cost of overhead, office and other sundry charges must be paid, so that from a selling standpoint it is worth in the average country weekly at least \$8.00 a column. Taking these figures into consideration, it will readily be seen that the giving of free publicity costs a newspaper real money.

If a woman has so all-day much question? Many have a fondness for rare old coins, but new ones are rather good for most of us.

Dr. Butler declared that there is no great man living in the world today, but he didn't say it in Rome.
